

EKO ALVİTRA DİLATASYON PROFİLLERİ

- Duvar, tavan ve zemindeki 12 mm açıklıktan 200 mm genişliğe kadar olan dilatasyon derz açıklıklarına uygun tipleri mevcuttur. Alüminyum profil boylarının standart boyları 4 metredir.
- Bina içinde döşemede, duvar ve tavanlarda ,dış cephede güvenle uygulanabilir. Otoparklar ve ağır yüke maruz alanlar için özel metal profil sistemleri üretilmektedir.
- Dilatasyon profilleri delikli montaj braketleri sayesinde döşeme betonu veya sıva altına çok iyi yerleşir.
- Kaplama üstü uygulanacak profiller kir tutmayacak şekilde düz yüzeyli ve naturel eloksallıdır.
- Profiller her yöndeki hareketleri absorbe eder.
- Alüminyum profillerle kullanılan kauçuk fitiller uzun ömürlü, her türlü iklime, yağlara, asitlere ve asfalta dayanıklı yüksek kalite malzemeden üretilmiştir.
- Kauçuk fitil istenildiğinde değiştirilebilir. Fitil boyları kesintisiz 20 metrelik boylarda uygulanabilmektedir.
- Standart EPDM kauçuk fitiller siyah renktedir. Gri, krem, kahverengi renk seçenekleri yüksek kalitede PVC olarak mevcuttur. Profiller su yalıtımında kritik rol oynar.

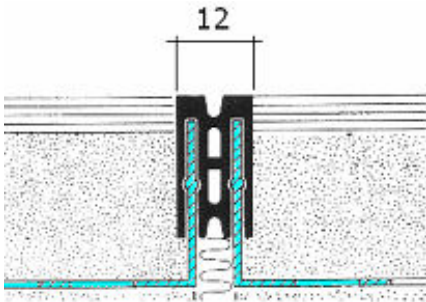

EXPANSION JOINT PROFILES :

- Aluminium profiles' standart production lenght is 4 meters.
- Rubber insert is replaceable at any time.
- Rubber insert can be installed in lenghts up to 20 meters.
- Insert colors are black, grey, beige and brown.
- Profiles absorbs settlements.
- Good fixing by perforated mounting brackets.
- Flexible insert made of high quality rubber, long wearing, weather resistant, temperature resistant, extensively resistant to oils, acids and bitumen.
- Our surface fixing profiles has a smooth surface and has no gaps to reduce dirt accumulation.
- Our profiles are suitable for shopping centers, supermarkets, airports, exhibition halls and hospitals.
- Our profiles series have types for floor wall ceilings for every expansion joint width and has all-metal profiles for heavy duty floors and car parks.
